Short Presentation

What is Italia NO DIG LIVE?

L'**Italia NO DIG LIVE** is the Italian trade fair focused entirely on Trenchless (or NO DIG) Technologies.

It is a showcase for the entire NO DIG production chain, especially national, and will offer the opportunity to:

- witness live the use of these technologies through **live demonstrations**;
- increase their theoretical and practical knowledge by attending Conferences and Technical Workshops accredited by various professional orders (e.g. engineers and geologists);
- establish new collaborations of both technological and business value with Italian and foreign companies.

The Second Edition of the European NO DIG Conference

During this event, **the Second edition of the European NO DIG Conference** will be held on 25 May.

This conference is the result of a cooperation between **UKSTT, FSTT, IBSTT, TSITT and IATT** and is the most important annual scientific and technical event on trenchless technologies at European level. Each year it is hosted by a different association.

Duration: full day in two sessions (morning / afternoon)

Language: English

Participants:

- leading European experts in trenchless technologies presenting papers.
- as listeners: technicians from local authorities, public authorities, students, design offices, underground utilities, companies.

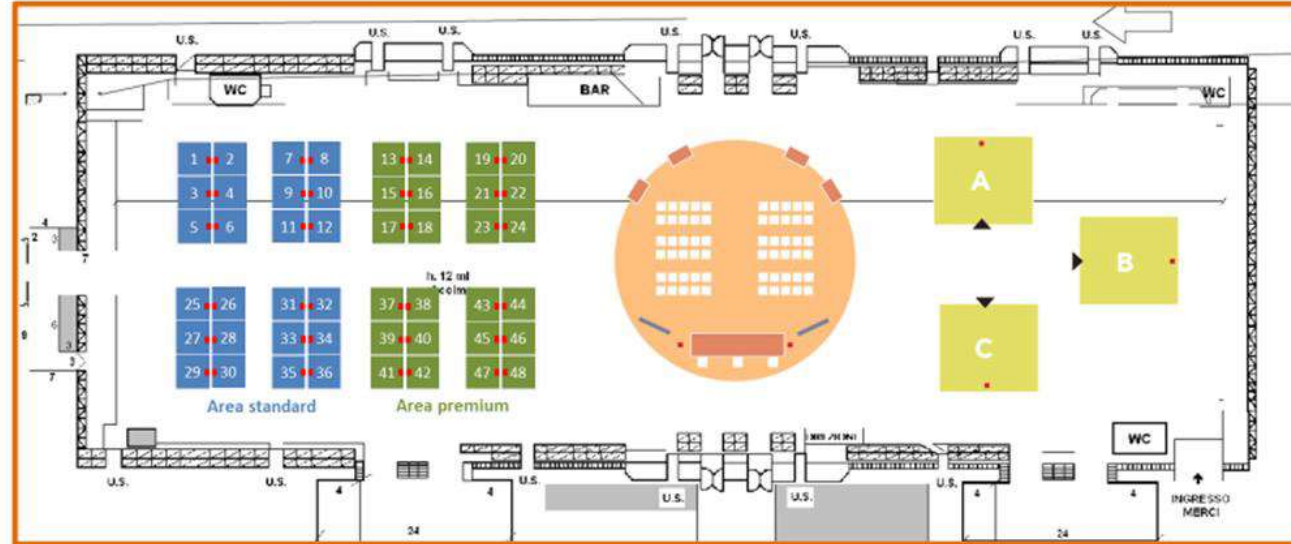

Target

- Technical offices of public authorities
- Utilities managers
- Road & motorway operators
- Contractors
- Design studios
- Machinery and materials manufacturers
- Students
- Professional Orders
- Universities
- Other associations
